Want to learn more about teaching in a classroom? Looking for experienced mentors to help you get started on your future educational career? The Center for the Integration of Research, Teaching & Learning at Texas A&M (CIRTL@TAMU), the Graduate & Professional School and the Center for Teaching Excellence are pleased to offer the College Classroom Teaching course to Texas A&M graduate students!

The College Classroom Teaching course will provide doctoral level students with the unique opportunity to discuss relevant teaching techniques with other graduate students and experienced faculty from multiple disciplines. Students will also design and implement a course module with a faculty mentor in an undergraduate classroom.

**Session Topics**

Students in the course will learn about the following:

- Course Development Cycle (CDC)
- Teaching Strategies
- Classroom Management
- Teaching-as-Research
- Assessment techniques
- Syllabus design
- ePortfolio
- Teaching & Diversity Statements

**For more information or to register for the course, please contact:**
